New York, 1st of February 2017

SpeechWare and its exclusive distributor for the US, **SRmicrophones** jointly announce the availability, within 45 days, of the new second-generation **FlexyMike Dual Ear Cardioid® (DEC) - FMKDEC**. Please check:

- <https://www.tablemike.com/flexymikes/dual-ear-cardioid-dec/>
- <http://www.srmicrophones.com/item.asp?i=361511> (still 1st Gen.)
- https://www.youtube.com/watch?time_continue=2&v=Ad5DUK8nkdk (testing the 1st Gen. in Niagara Falls!)
- <https://www.tablemike.com/wp-content/uploads/2015/05/Comparison-of-new-FlexyMike-DEC-with-the-new-Sennheiser-ME3-II.pdf> (an independent report by a speech recognition expert)

Following on the success of the award-winning **FlexyMike Dual Ear Cardioid (DEC)** series, chosen as the “*Finest headset*” in its category by the American leading computer magazine MacWorld and others (<http://www.macworld.com/article/2601908/flexymike-dual-ear-cardioid-review-one-of-the-finest-mics-available-for-dictation-on-your-mac.html>), the second-generation FlexyMike DEC features the SAME highly sensitive unidirectional microphone capsule but at the same time:

- an industry first adjustable headband
- a vertical cable connector in one side (instead that in the middle of the headband as the former model) for improved wearer comfort and perfect stability in a “desktop like” position (check the 2nd picture on the right).

Besides, this unique headset offers two (2) positioning styles:

- the standard, around the head, but now with an industry first adjustable headband to be used with (or without) any USB audio adapter, as for instance the optional *SpeechWare USB MultiAdapter* under Blue LED for normal range dictation

- a special “desktop like” position, when setting the *SpeechWare USB MultiAdapter* with the Green LED for long-range dictation providing an outstanding practical range of up to 1.5 m with the latest version of *Dragon NaturallySpeaking 15* (check the 2nd picture above)!

The *FlexyMike DEC* comes bundled with:

- a special adapter for connection of the headset to iPhone/iPad/Android (CTIA recent models) smartphones and tablets
- a cable tie clip for user convenience
- a handy cable winder
- a spare windscreen
- a case for easy storage and transportation.

Advantages of the *FlexyMike DEC*

- Adjustable headband to fit any user head and improved stability in a “desktop like” position
- Highly sensitive unidirectional cardioid microphone capsule
- Outstanding voice pick up, which is essential for speech recognition accuracy
- Two working modes: (1) the standard, around the head, but the adjustable headband and (2) a special “desktop” like, when setting the optional *SpeechWare USB MultiAdapter* with the Green LED for long-range dictation.

Further commercial information about the *FlexyMike DEC - FMKDEC*
