

SpeechWare USB TravelMike® with Speech Equaliser (SQ) & Accesories

Speech Recognition Accuracy & Comfort

*The **smallest existing portable Laptop or Desktop USB Microphone** for long-range dictation, voice recording & high definition (HD) VoIP on the move!*

Enjoy the amazing freedom of working hands-free, comfortably and with amazing accuracy anywhere...

Combines a mini-snubnosed flexible tip microphone and the award-winning USB MultiAdapter with a proprietary Speech Equaliser (SQ), for long-range dictation, unparalleled performance and comfort of use. Available with very practical bundle accessories: one USB hub with 4 ports to be used as a Base and one USB Type-C adapter.

European Union Design Patents No 002298208-0001 for the USB MultiAdapter® and No 002298208-0002 for the USB TravelMike®.

"B" model - USB Base & Type-C Adapter

- Fully compatible with both Windows® and MacOS® (with the USB Type-C adapter included in the "Base" model)
- High sensitive, unidirectional, noise cancelling and detachable 5 cm - 2" long mini snub-nosed microphone for professional Speech Recognition or Voice Recording with standard 3 pinout connector
- Industry first integrated Speech Equaliser (SQ) for optional use, providing maximum dictation range and accuracy
- Supports wideband High Definition VoIP ideal for Skype®
- Standard 3.5 mm Input & Output Sound ports in the SpeechWare USB MultiAdapter® (possibility to connect any headset instead of the mini snub-nosed mic in extremely noisy environments)
- Two models: the economic Standard "S" for direct Laptop connection and the "B" (from Base) for Laptop and Desktop use (see picture above)
- One year warranty or two with registration

Contents of the box

- USB MultiAdapter®
- High sensitive, unidirectional, noise cancelling mini snub-nosed microphone
- Microphone windshield
- Proprietary 90 degrees USB golden plated USB connector
- USB cable extension ("S" model)
- USB hub with 4 ports, one of which USB 3.0, to use as a Base (only with "B" model)
- USB Type-C Adapter ("B" model only)

The integrated Speech Equaliser (SQ) for optional use delivers very high voice fidelity and recognition accuracy from 20 cm up to 50 cm (8" - 20") or more with the mini snub-nosed microphone, depending upon voice volume and ambient noise, comparable to that of the best headsets in the market! Optimal dictation distance with the SQ active (Green LED): about 30 cm or 12"

Additional recommended accessories (sold apart or bundle with the "B" model):

- 4-ports USB hub with one high speed 3.0 port and retractable cable to use as a desktop base for the microphone
- USB Type-C Adapter for Mac OS® and other Windows® notebooks or tablets
